**Attachments:** NAS 2019\_Class Approach to Hazard Assessment of Organohalogen Flame Retardants.pdf

Hi Cathy- That is great. I talked with Mike as well and will plan on attending the HBCD-specific days. Please share this May 2019 NAS report with the exposure and hazard teams. There are a lot of parallels between recommendations in this report and past/current/future work that OPPT has done with FR chemicals.

-Charles

Just spoke to Mike. I'm going to send him an email as follow up; he didn't think it should be an issue. We're planning to release the document for inter- and intra-agency review tomorrow with peer review scheduled for the week of July 29 for HBCD, 1-BP and 1,4-Dioxane.

Thanks,

Cathy

**Subject:** Checking in-

Hi Cathy-

I have been at CPSC for a few weeks now, and I passed my contact information on to Karen earlier. I have had some follow-up from Chantel and Eva on HBCD, but not really for any other projects. I wanted to check-in, and let people know it is OK to contact me if they have any questions or if I could help clarify anything about any of the projects I worked on.

I was also wondering if you had had a chance to check-in with Mike Babich about the HBCD peer review and related work over the summer.
